

Scaling Up CONSERV: a Model to Curb Legal Deforestation in the Brazilian Amazon

**UN CLIMATE
CHANGE
CONFERENCE
UK 2021**

IN PARTNERSHIP WITH ITALY

In October 2020, the Amazon Environmental Research Institute (IPAM), Environmental Defense Fund (EDF), and Woodwell Climate Research Center launched the CONSERV initiative. The initiative uses financial incentives to pay agricultural producers to preserve forests that could be legally deforested inside their farms. During this session, participants will discuss CONSERV's progress to date and plans to scale it throughout Brazil, as well as share demand-side insights and co-benefits perspectives.

**8 November 2021
1 PM - 2 PM GMT**

**Nature Pavilion (Blue Zone)
Glasgow**

Limited
Seats in-person
